# Personal Projects

## Rust Basefinder

<https://rustbasefinder.com/> - <https://github.com/lesageethan/Rust-BaseFinder>

A forum-style website which allows players of Rust to share designs for in-game constructions. Allows these designs to be compared, rated, reviewed, and recommended. This site has been live for almost 3 years and has amassed over 1,000 accounts and 300,000 pageviews. Last year the site was approved for AdSense and is now self-sufficient.

## Love Island Sentiment Analysis

<https://github.com/lesageethan/loveisland-sentiment-analysis>

A Python script for scraping recent tweets concerning Love Island, analysing their sentiment, and outputting results to inform predictions on which contestant may win or be evicted.

## Wordle Solver

<https://github.com/lesageethan/wordle-solver>

A script which uses inputs from the user to find the wordle of the day automatically, usually within 5 guesses.

## Personal Website and Freelance Web Development
